

Data Analyst with 3+ years' experience collecting, validating, cleansing and analysing large, complex datasets from multiple sources to produce accurate, trusted information for reporting and decision-making.

Skilled in building dashboards, investigating trends and discrepancies, and communicating findings clearly to both technical and non-technical audiences. Experienced with SQL, Python, Excel, Tableau, Looker Studio and data transformation pipelines, with a strong track record of working collaboratively to improve data quality and turn complex information into actionable insight.

EXPERIENCE

Renewable Energy Data/Operations Analyst

03/2023 – 09/2026

OVO Energy

- Receive, validate and cleanse large volumes of billing, consumption and certificate transfer data from multiple external sources, checking submissions against agreed templates, business rules and data standards
- Investigate and resolve data quality issues across BigQuery datasets feeding a live, multi-million-pound, regulator-facing reporting process, maintaining accuracy and auditability standards
- Built and maintain ETL-style pipelines (GCS to BigQuery, orchestrated via Airflow/Composer) that import and transform partner data, such as certificate transfer files and half-hourly readings, into core systems
- Record, track and help resolve issues identified during data validation and post-import review, maintaining clear documentation of checks, queries, decisions and outcomes
- Design and build dashboards and reports (Tableau, Looker Studio) used for operational and regulatory reporting purposes
- Partner with stakeholders across Trading, Finance and IT to investigate data queries, agree corrections and support reliable, auditable reporting

Zero Carbon Living Advisor

08/2022 – 03/2023

OVO Energy

- Applied a data-driven, consultative approach to assess customer usage and communicate tailored recommendations clearly and confidently to a non-technical audience
- Diagnosed customer queries in high call volume scenarios, resolving billing and technical discrepancies while maintaining a high first-time resolution rate and data accuracy
- Partnered with specialist teams to investigate and resolve account anomalies, improving workflow and operational efficiency
- Elected as Plan Zero representative for the team, acting as subject matter expert and sharing knowledge with colleagues on new initiatives

EDUCATION

Bachelor of Environmental Geoscience

Graduation Year: 2022

University of Bristol

CERTIFICATES

Bristol Plus Award

University of Bristol, 2022

Environmental Resource Management (ERM) Prize

University of Bristol, 2022

SKILLS

Technical:

SQL (BigQuery), Python (Pandas), Excel (VBA/Macros), Airflow/Composer, GitHub

Visualization:

Tableau, Looker Studio, Data Storytelling, ETL Pipeline Development

Methodology:

Data Validation & Quality Assurance, Data Cleansing & Reconciliation, Stakeholder Engagement, Process Improvement

LANGUAGES

Fluent: English    Native: Latvian    Basic: Russian

ADDITIONAL

- Champion learning and development within the team - organising industry event attendance, running lunch & learns, and trialling upskilling platforms (e.g. Skillsoft)
